Why do I need **skin protection?**

You're at risk for painful skin damage

Simply cleaning and moisturizing your skin after an incontinence episode may not be enough to prevent many serious skin

issues. Exposure to moisture can lead to incontinence-associated dermatitis (IAD) and painful skin breakdown.¹

Soothing **Comfort Shield® Barrier Cream Cloths** cover your skin with a clear, protective dimethicone barrier cream to help seal out wetness while treating and protecting irritated skin. Research shows that by applying a barrier after each incontinence episode, skin breakdown can be reduced.²

A solution that feels good

- Soft, disposable cloths replace basins, which may contain harmful bacteria that can cause infection.³

- All-in-one cloths cleanse, moisturize, deodorize, treat, and provide protection for your skin.

- The solution is hypoallergenic, not made with natural rubber latex, and gentle for even the most sensitive skin.

¿Por qué necesito protección para la piel?

Usted corre el riesgo de sufrir un doloroso daño a la piel

Simplemente limpiar y humectar su piel después de un episodio de incontinencia podría no ser suficiente para prevenir muchos problemas graves en la piel. La exposición a la humedad puede provocar una dermatitis asociada con la incontinencia (incontinence-associated dermatitis, IAD) y una dolorosa degradación cutánea.¹

Los Paños con crema de barrera **Comfort Shield**® cubren su piel con una protectora crema de barrera transparente de dimeticona para ayudar a mantener alejada la humedad a la vez que trata y protege la piel irritada. Las investigaciones muestran que al aplicar una barrera después de cada episodio de incontinencia se puede reducir la degradación cutánea.²

Una solución que se siente bien

- Los paños suaves y descartables reemplazan a los cuencos, los que pueden contener bacterias nocivas que pueden producir infección.³

- Los paños todo en uno limpian, humectan, desodorizan, tratan y protegen su piel.

- La solución es hipoalergénica, no fabricada con látex de caucho natural, y suave para incluso la piel más sensible.
