# Designed for **maximum protection**

## Flyte Toga

Confidently meeting surgical challenges becomes easier when you have the most effective barrier we offer against the spread of disease: Stryker's Flyte Personal Protection Toga.

Leading-class **AAMI Level 4** protection helps safeguard against:

**Contamination**

**Exposure to infectious  
bodily fluids**

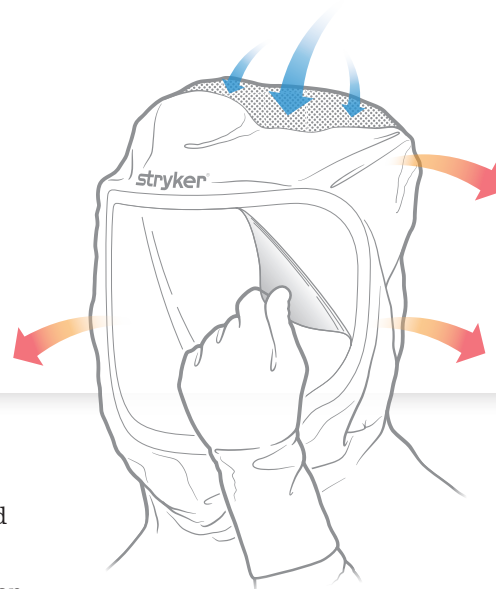

**Transfer of microorganisms  
and particulate matter**

# Stay confident knowing you're protected

You and your surgical team demand a high degree of protection. During every procedure, that's exactly what you'll get from our Flyte Toga – and here's why.

AAMI Level 4 Flyte Toga, comprised of tri-laminate BVB (breathable viral barrier) which is a medical fabric treated for resistance to bacteria-infesting viruses, provides:

- A superior barrier against liquid and viral contamination
- Our highest level of protection against exposure to infectious bodily fluids, and transfer of microorganisms and particulate matter

Soft and lightweight BVB fabric keeps you cool, dry and comfortable during long and complex procedures

Sealed seams and covered zipper provide a strong, secure barrier against contamination

A full range of sizes fit you correctly without bulky excess fabric or tugging seams

Specifically designed for use with Stryker's Flyte Helmet

## Industry-exclusive PeelAway Lens System

- Helps you maintain clear visibility during surgery
- Eliminates the need for continuous wiping and cleaning during surgery
- If obstructed, the top lens easily peels away to reveal a sterile second or third lens

### Flyte Toga, zippered
